

Hong Kong: IP-Based Financing Hub

“One Country, Two Systems” makes Hong Kong a game-changer for developing business in today’s evolving world economy. As a Special Administrative Region of China, Hong Kong’s unique heritage provides the territory with an unrivalled blend of legal, financial and commercial infrastructure, strategically placed to access the world’s fastest growing economies. As China’s only common law jurisdiction and with a flexible IP system and separate free-market economy, Hong Kong has a business-friendly environment, low tax, internationalised financial system and free capital flows, yielding compelling opportunities as a hub for IP-based business development and financing.

Join this “fireside chat”, co-hosted by Hong Kong Trade Development Council, Hong Kong Economic and Trade Office and DCC, to hear valuable up-to-date insights and experiences from experts and those that have been there building IP portfolios and securing financing based on savvy IP strategy and leveraging Hong Kong’s unparalleled opportunities.

Jack Shan
Managing Principal
QANTM Valuations

Jack is a Chartered Financial Analyst and registered patent attorney with over 17 years of experience advising clients on the protection, monetisation and valuation of intellectual property assets across legal, strategic and commercial contexts.

Known for his ability to bridge financial, technical and legal perspectives, Jack has delivered IP valuations and royalty assessments for a broad range of clients – from high-growth start-ups and iconic Australian brands to regulatory bodies and courts. His work supports governance, compliance, litigation, transactions and board-level decision-making.

Lyn Chan
Associate (Patents)
DCC Australia

Lyn is a registered patent attorney specialising in patent drafting, prosecution, and IP strategy across a broad spectrum of biotechnology innovations—including molecular and cell-based therapies, vaccines, diagnostics, synthetic biology, genetically modified organisms and plants, food tech, and bio-recycling.

She has a strong track record advising corporate, academic, and startup clients, helping them navigate complex IP considerations and maximise the commercial potential of their technology. She enjoys guiding early stage-ventures build IP strategies that are aligned with their business goals and position them for growth in both domestic and international markets.

Prior to joining DCC, Lyn completed a PhD in molecular genomics and cell biology at the University of Melbourne, followed by postdoctoral research at Monash University focused on stem cell genomic integrity and molecular drivers of ALT cancers. Her deep scientific expertise underpins her commercially focused approach to IP, making her a valuable partner to founders and investors operating at the cutting edge of biotech.
